

The COOLER RANGE

COMPRESSOR TECHNOLOGY

PERFORMANCE

Down to -20°.

MODULAR

The door opens in both directions

PRACTICAL

Drain plug and LCD screen

ROBUST

Quality materials and reinforcements

THIS STURDY COOLER IS THE IDEAL COMPANION FOR ALL YOUR TRAVELS, KEEPING YOUR REFRESHMENTS, PERISHABLES AND FROZEN FOOD COLD!

Its cooling capacity does not depend on the outside temperature, so even in very hot conditions it can cool and freeze efficiently between +20°C and -20°C! Plugs into a 12/24 V DC cigarette-lighter socket, or 230 V socket (adapter sold separately). The cooler has a solid, scratch-resistant metal construction. What's more, a drain plug at the bottom of the cooler makes it easy to clean. Its flat, recessed lid holds 4 glasses and a rectangular dish. Two fixed handles on the sides make it easy to move the cooler.

PERFORMANCE

Temperature range from -20°C to +20°C to ensure your food and drinks stay fresh at all times. Thanks to its large compartment, you can store 1-litre bottles (for the 30 and 40L models).

MODULABLE

This cooler adapts to the configuration of your vehicle with its two-way door opening. You can quickly change the opening direction to make it easier to install in your existing layout.

DESIGN AND ROBUSTNESS

The aluminium finish gives this cooler elegance and design, while retaining its sturdiness in use thanks to the 4 plastic reinforcements in each corner.

COMMUNICATION

This cooler features an intuitive touchscreen LCD display for easy control and monitoring of temperature and battery status. It features a handy USB socket for charging all your devices: phones, tablets and smartphones.
