### PLAY ALONG AND CREATE YOUR OWN TETRISOL PUZZLE!

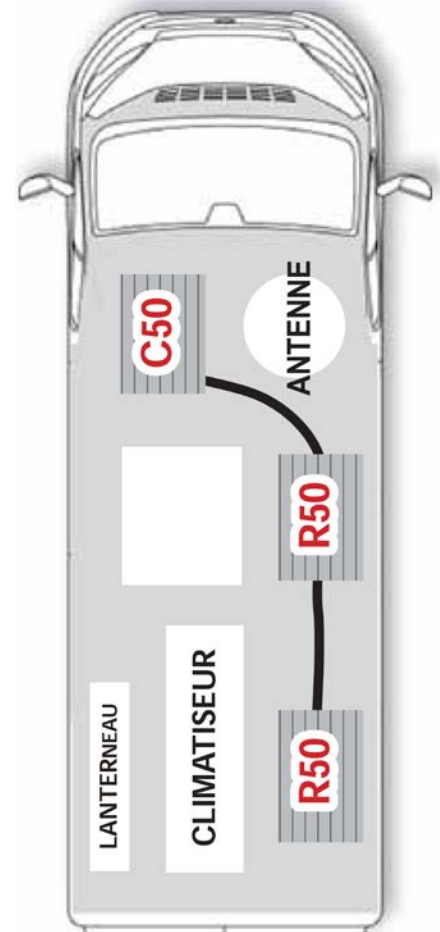

With the TETRISOL range of solar panels from EZA, you don't have to worry about the space available on the roof of your van!

When the space left on the roof of your VDL doesn't allow you to install a standard solar panel, TETRISOL photovoltaic panels are the solution for you!

With a choice of square or rectangular shapes, EZA's TETRISOL panels can be adapted to any configuration.

Made up of high-efficiency PERC cells, TETRISOL modules have a power output of 50W.

What's more, thanks to the «Plug & Play» MC4 connectors, up to 3 panels can be connected together in parallel, giving you an output of 150W (3 x 50W).
