

The BLIZZ-E EZA compression refrigerator is designed for recreational vehicles. It keeps food cool or frozen and operates continuously, regardless of external conditions. It fits easily into compact kitchen layouts.

#### Equipment adapted to recreational vehicles

BLIZZ-E refrigerators are available in several models to suit different layouts. They offer an organised interior space with a vegetable drawer, adjustable shelves and removable bins. All models have a freezer and a reversible door for easy installation in the vehicle.

#### Reliable operation and mobile app control

Thanks to compression technology, the refrigerator maintains consistent performance. It operates on 12 or 24 volts and can be used on the move or when camping. For a nomadic lifestyle, it can be connected to a lithium auxiliary battery. The temperature can be controlled remotely via the Blizz-E mobile app using Bluetooth and via an external LCD screen with a digital control panel.

#### BLIZZ-E models and their features

The F40, F50, F65 and F80 models feature a vegetable crisper, freezer, adjustable shelves, removable bins and interior lighting. The F80 model features a double door. Each model has a door locking system. All models are equipped with R600a refrigerant, an environmentally friendly gas with a GWP of less than 3.
