Smart Power EZA TWIN roof air conditioner – EZA

The Smart Power EZA TWIN is a roof-mounted air conditioner designed for recreational vehicles. It is based on the Smart Power EZA model and incorporates a TWIN Rotor compressor to improve operating comfort.

Inverter and TWIN Rotor technology

Inverter technology enables smoother operation to limit temperature fluctuations. The TWIN Rotor compressor contributes to more linear operation, reducing vibration and noise.

Acoustic comfort and diffusion

In addition to the Twin Rotor, the compressor is mounted on Silentbloc to reduce mechanical noise and micro-vibrations. The extra-slim diffuser is equipped with LED mood lighting and an LCD display.

Reversible operation and control

The air conditioner is reversible for heating and cooling and operates over a wide range of temperatures. Built-in WiFi allows control via a dedicated app from a smartphone or tablet.

EXTRA-SLIM DIFFUSER

The extra-slim diffuser is equipped with LED mood lighting and an LCD display.

R32 refrigerant gas

EZA rooftop air conditioners use R32 refrigerant gas, which is more environmentally friendly in terms of CO₂ emissions. It is twice as environmentally friendly as R134A gas and four times more than R410A.
